City: Brașov

About me

I'm a friendly and organized person who enjoys helping others and keeping things running smoothly. My background includes content moderation, where I learned to stay calm, handle sensitive situations, and communicate clearly. I also have an Informatics degree and enjoy working on small development projects in my free time, which keeps my problem-solving skills sharp. Whether I'm supporting customers, coordinating tasks, or working with a team, I bring patience, kindness, and a positive attitude to everything I do.
Programming languages which I know are: Java, C++, Python, C#, JavaScript, HTML/CSS, Java spring, Maven, Node.js.
Other software tools: SQL, PL SQL, Git, Bash scripting, .NET, Angular, Postman, Docker.

Professional experience

Experience by departments

Other : **2 years and 10 months**

IT Software : **1 year and 6 months**

Dec 2023 - present

2 years and 10 months

Senior Content Moderator - Teleperformance

Brașov | Other | IT / Telecom

Reviewed user content to ensure it followed platform rules.
Flagged and escalated sensitive or risky material when needed.
Adapted quickly to policy updates and new tools.

May 2025 - Jul 2026

1 year and 3 months

Software Developer - Double Slit SRL

Remote (from home) | IT Software | IT / Telecom

I had the opportunity to contribute to a very interesting project at Double Slit SRL, working on the logic-puzzle platform: https://www.ghosted-rooms.com/

Throughout this project, I worked across several technical areas:

• I developed features on the Blogger platform for rendering puzzles (interactive selection, display, real-time validation)
• I ported an existing UWP application to WinUI 3 with the help of AI — this application generates the puzzles published on the platform

• I contributed to the development of the generator's interface, used both for web publishing and for creating puzzle books on Amazon
• The generator is built on top of a C# engine responsible for generating and validating puzzles (uniqueness, difficulty)

AI was used as a support tool during development (migration, implementation, UI), not for generating the puzzles themselves.

It was a great experience working at the intersection of algorithms, UI, and digital publishing.

Acquired skills and competencies:
HTML, JavaScript, CSS, c sharp, nosql, winui

Jul 2023 - Aug 2023
1 month

Software developer - .msg system Romania

Cluj-Napoca | IT Software | Education / Training

During this training, I devoted three weeks to learning and an additional three weeks to implementing a project, collaborating effectively with a team of five members. In this team, I assumed the role of leading the Front End aspects.

Acquired skills and competencies:
Java, angular, Spring Boot

May 2023 - Jun 2023
2 months

Software developer - .msg system Romania

Târgu Mureș | IT Software | Education / Training

During this internship, I collaborated with three team members to develop an e-commerce website for purchasing video games online. The website was built using Angular and Java. We communicated and shared our ideas using Trello.

Acquired skills and competencies:
Java, angular, Spring Boot

Education

2019 - 2023

Bachelor's degree - University of Sapientia

Informatics | Romania

Skills

General skills

Other sections

Projects

MemoryCardGame

period Sep 2023 - Feb 2026

A simple web-based memory card game built with HTML, CSS, and JavaScript. The goal is to match pairs of cards while keeping track of your attempts and improving your memory skills.

eTickets

period Sep 2022 - Jun 2023

The thesis focuses on developing and dockerizing the “eTickets” web application built in .NET, which enables users to purchase movie tickets online. Online shopping has grown significantly due to its convenience, wide product availability, and time-saving nature. Customers can buy what they need from anywhere, compare options easily, and avoid physical stores.
